

FACILITY SECURITY PROGRAM

Construction and maintenance of safe and secure facilities to support the instruction of students by the School Corporation's staff involves a substantial investment of public funds. It is therefore in the interest of the school community that the School Board protect its investment in facilities by implementing a security program.

The Superintendent shall develop and supervise a program for the security of the Corporation's students, staff, visitors, buildings, grounds and equipment. This program may include the use of video and audio monitoring and recording equipment on the Corporation's grounds and in the Corporation's vehicles.

The Board directs the Superintendent to identify persons who knowingly or negligently damage property or expose persons to the risk of harm in the course of Corporation activities. If persons responsible for harm or risk of harm to a person or property damage are identified, the Board directs the Superintendent and staff to cooperate in the prosecution of these persons and to pursue recovery of the cost of repair or replacement of damaged property.

In implementing the security program required by this policy, the Board authorizes the Superintendent to direct a person to not come on Corporation property, leave Corporation property, or that s/he may not attend a Corporation activity when the Superintendent determines that the person's presence may be a danger to others. If a person does not comply with such a directive, the Board authorizes the Superintendent to seek arrest of the person by a law enforcement officer and prosecution of the person for the Class D felony of Criminal Trespass on School Property, as found at I.C. 35-43-2-2(b)(1) or (2). A decision by a designee of the Superintendent may be reviewed and modified by the Superintendent.

The Superintendent is authorized to purchase and install walk-through metal detectors and video and audio monitoring equipment on school property in order to protect the health, welfare, and safety of students, staff, parents and other visitors, and Corporation property.

The Superintendent also is authorized to purchase hand-held metal detectors and permit administrative staff, school resource officers, and other personnel trained in the usage of hand-held metal detectors to utilize such metal detectors as a part of a comprehensive program of school security and safety of students, staff, parents and other visitors.

The Superintendent may acquire metal detectors or wands approved for the District's intended use, and the Superintendent or his/her designee shall:

- 1) develop procedures for implementing this policy,
- 2) schedule training and re-training for all personnel using metal detectors,
- 3) coordinate all District metal detector tests in accordance with the requirements as outlined in the manufacturer's specifications and these procedures,
- 4) maintain records for the purchase, training, and testing of metal detectors.

Metal detectors, both walk-through and hand-held wands, will be used only in accordance with the Superintendent's administrative guidelines.

When a school administrator has a reasonable suspicion, as defined in Board Policy 5771, to believe a weapon is in the possession of a person, walk-through and hand-held metal detectors may be used.

Administrative searches are permitted when specifically authorized by the Superintendent, utilizing procedures developed in advance, and based upon a reasonable belief that a violent or dangerous event at a school may be prevented thereby.

The Board authorizes the search of all persons entering Corporation buildings, boarding or riding Corporation buses/vehicles owned by, or contracted for, the Corporation, entering Corporation property, attending events on Corporation property, attending school activities off site. Such searches may be conducted using walk-through or hand-held metal detectors as a part of a comprehensive program of safety and security.

The Board authorizes the random search of all persons entering Corporation buildings, boarding or riding Corporation buses/vehicles owned by, or contracted for, the Corporation, entering Corporation property, attending events on Corporation property, attending school activities off site. Such searches may be conducted using walk-through or hand-held metal detectors as a part of a comprehensive program of safety and security.

If a person has a medical condition that prohibits them from going through a walk-through metal detector, then only a hand-held metal detector may be used.

The Superintendent shall require that notice of the Corporation's intent to conduct such searches is provided at least annually to all Corporation staff members, students and their parents, and visitors, including an outline of the procedure to be utilized during a search.
