School City of Hobart Families,

Out of an abundance of caution and utilizing preemptive measures due to the Coronavirus (COVID-19), in collaboration with state and local authorities, the School City of Hobart will be closed starting Monday, March 16, 2020 through Friday, April 10, 2020.

After closely monitoring the situation, consulting with medical experts, and giving careful consideration to what is best for our students, staff, and the community we serve, the determination has been made to close all schools effective Monday, March 16, 2020.

Contingency plans will be put in place to ensure that uninterrupted learning experiences will be available for our students. ELearning will start next week. You will receive additional information regarding what to expect, detailed logistics, and where to find important updates.

That additional information will include eLearning days, waiver days, and events that have been cancelled that may be able to be rescheduled if conditions change. You can find important updates by visiting the School City of Hobart's website:

<https://www.hobart.k12.in.us/coronavirus>.

Although we know this may cause challenges for our families, it is essential for us to prioritize health and safety by implementing our pandemic plans and doing everything we can to support our community throughout this quickly evolving health emergency.

This measure to close schools is being implemented to slow the spread of the virus by social isolation and distancing. For this reason, it is encouraged that staff and students not go out into public spaces frequently or large gatherings during the closure time.

Our district will remain in close collaboration with federal, state, and local authorities during this closure. More information about COVID-19 is available at <https://www.in.gov/isdh/28470.htm> or www.cdc.gov/covid-19.

If you have questions or concerns regarding the Coronavirus, please contact your primary healthcare provider or the Lake County Board of Health at (219) 755-3655. The Indiana State Department of Health can be contacted at (317) 233-7125 or after-hours at (317) 233-1325. While our buildings are closed, the Brickie Clinic and Immediate Care will remain open.

Enclosed in this communication are some important tips on what to do if you suspect you have the virus or are experiencing symptoms, and safety precautions to stay healthy during this time. The Brickie community will be strong and work together to get through this health emergency.

Sincerely,

Peggy Buffington, Ph.D.
Superintendent of Schools
School City of Hobart

The School City of Hobart does not discriminate on the basis of race, creed, sex, color, national origin, religion, age, sexual orientation, marital status, genetic information, or disability, including limited English proficiency.

If you are sick with COVID-19 or suspect you are infected with the virus that causes COVID-19, follow the steps below to help prevent the disease from spreading to people in your home and community.

Stay home except to get medical care

You should restrict activities outside your home, except for getting medical care. Do not go to work, school, or public areas. Avoid using public transportation, ride-sharing, or taxis.

Separate yourself from other people and animals in your home

People: As much as possible, you should stay in a specific room and away from other people in your home. Also, you should use a separate bathroom, if available.

Animals: Do not handle pets or other animals while sick. See [COVID-19 and Animals](#) for more information.

Call ahead before visiting your doctor

If you have a medical appointment, call the healthcare provider and tell them that you have or may have COVID-19. This will help the healthcare provider's office take steps to keep other people from getting infected or exposed.

Wear a facemask

You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) or pets and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not stay in the same room with you, or they should wear a facemask if they enter your room.

Cover your coughs and sneezes

Cover your mouth and nose with a tissue when you cough or sneeze. Throw used tissues in a lined trash can; immediately wash your hands with soap and water for at least 20 seconds or clean your hands with an alcohol-based hand sanitizer that contains at least 60% alcohol covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty.

Avoid sharing personal household items

You should not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people or pets in your home. After using these items, they should be washed thoroughly with soap and water.

Clean your hands often

Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, clean your hands with an alcohol-based hand sanitizer that contains at least 60% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty. Avoid touching your eyes, nose, and mouth with unwashed hands.

Clean all "high-touch" surfaces every day

High touch surfaces include counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.

Monitor your symptoms

Seek prompt medical attention if your illness is worsening (e.g., difficulty breathing). **Before** seeking care, call your healthcare provider and tell them that you have, or are being evaluated for, COVID-19. Put on a facemask before you enter the facility. These steps will help the healthcare provider's office to keep other people in the office or waiting room from getting infected or exposed.

Ask your healthcare provider to call the local or state health department. Persons who are placed under active monitoring or facilitated self-monitoring should follow instructions provided by their local health department or occupational health professionals, as appropriate. When working with your local health department check their available hours.

If you have a medical emergency and need to call 911, notify the dispatch personnel that you have, or are being evaluated for COVID-19. If possible, put on a facemask before emergency medical services arrive.

Discontinuing home isolation

Patients with confirmed COVID-19 should remain under home isolation precautions until the risk of secondary transmission to others is thought to be low. The decision to discontinue home isolation precautions should be made on a case-by-case basis, in consultation with healthcare providers and state and local health departments.

Keeping the workplace safe

Encourage your employees to...

Practice good hygiene

- Stop handshaking – use other noncontact methods of greeting
- Clean hands at the door and schedule regular hand washing reminders by email
- Create habits and reminders to avoid touching their faces and cover coughs and sneezes
- Disinfect surfaces like doorknobs, tables, desks, and handrails regularly
- Increase ventilation by opening windows or adjusting air conditioning

Be careful with meetings and travel

- Use videoconferencing for meetings when possible
- When not possible, hold meetings in open, well-ventilated spaces
- Consider adjusting or postponing large meetings or gatherings
- Assess the risks of business travel

Handle food carefully

- Limit food sharing
- Strengthen health screening for cafeteria staff and their close contacts
- Ensure cafeteria staff and their close contacts practice strict hygiene

Stay home if...

- They are feeling sick
- They have a sick family member in their home

What every American and community can do now to decrease the spread of the coronavirus

Keeping the school safe

Encourage your faculty, staff, and students to...

Practice good hygiene

- Stop handshaking – use other noncontact methods of greeting
- Clean hands at the door and at regular intervals
- Create habits and reminders to avoid touching their faces and cover coughs and sneezes
- Disinfect surfaces like doorknobs, tables, desks, and handrails regularly
- Increase ventilation by opening windows or adjusting air conditioning

Consider rearranging large activities and gatherings

- Consider adjusting or postponing gatherings that mix between classes and grades
- Adjust after-school arrangements to avoid mixing between classes and grades
- When possible, hold classes outdoors or in open, well-ventilated spaces

Handle food carefully

- Limit food sharing
- Strengthen health screening for cafeteria staff and their close contacts
- Ensure cafeteria staff and their close contacts practice strict hygiene

Stay home if...

- They are feeling sick
- They have a sick family member in their home

What every American and community can do now to decrease the spread of the coronavirus

Keeping the home safe

Encourage your family members to...

All households

- Clean hands at the door and at regular intervals
- Create habits and reminders to avoid touching their face and cover coughs and sneezes
- Disinfect surfaces like doorknobs, tables, and handrails regularly
- Increase ventilation by opening windows or adjusting air conditioning

Households with vulnerable seniors or those with significant underlying conditions

Significant underlying conditions include heart, lung, kidney disease; diabetes; and conditions that suppress the immune system

- Have the healthy people in the household conduct themselves as if they were a significant risk to the person with underlying conditions. For example, wash hands frequently before interacting with the person, such as by feeding or caring for the person
- If possible, provide a protected space for vulnerable household members
- Ensure all utensils and surfaces are cleaned regularly

Households with sick family members

- Give sick members their own room if possible, and keep the door closed
- Have only one family member care for them
- Consider providing additional protections or more intensive care for household members over 65 years old or with underlying conditions

What every American and community can do now to decrease the spread of the coronavirus

Keeping commercial establishments safe

Encourage your employees and customers to...

Practice good hygiene

- Stop handshaking – use other noncontact methods of greeting
- Clean hands at the door, and schedule regular hand washing reminders by email
- Promote tap and pay to limit handling of cash
- Disinfect surfaces like doorknobs, tables, desks, and handrails regularly
- Increase ventilation by opening windows or adjusting air conditioning

Avoid crowding

- Use booking and scheduling to stagger customer flow
- Use online transactions where possible
- Consider limiting attendance at larger gatherings

For transportation businesses, taxis, and ride shares

- Keep windows open when possible
- Increase ventilation
- Regularly disinfect surfaces

What every American and community can do now to decrease the spread of the coronavirus
