TRIFECTA SPORTS SOLUTIONS

We Take The Hit For You

HOW WE BEGAN

Trifecta was started in the senior engineering class that is provided at Hobart High School. In this class, we came together and talked about our problem first and what needed to be solved.

Our problem was that roughly 67,000 head injuries happen yearly in high school athletics. This statistic is what led to the birth of Trifecta.

*GIVE YOUR CHILD THE
SAFE FUTURE THAT
THEY DESERVE!*

SPECIALTY

Contact Sports

Our main focus at Trifecta is the safety in contact sports. More specifically Football, once we figure out the safest way to protect the athletes in Football. Once we do this, we will be able to implement our system into other forms of sport such as Baseball, Softball, Motor Racing, and possibly even Rugby. These advancements will lead to a safer environment and better future for the athletes for generations to come.
