## School Quality Factors Report

This diagnostic instrument is designed to guide schools through a meaningful process of self-assessing their current policies, practices and conditions in order to identify areas in which they need to improve. The AdvancED School Quality Factor™ (SQF™) serves as the research based framework for this diagnostic instrument, ensuring that as school engage in the self-assessment process, their efforts are focused on a key set of factors that research confirms are levers for change and improvement.

Through a series of guiding questions, schools assess their performance related to specific practices and conditions that reflect the elements that must be evident to support institutional effectiveness related to each School Quality Factor. Comments, insights, and evidence in support of the school's response to each factor can also be provided.
