Why is it important for Hoosiers to fill out the census in 2020?

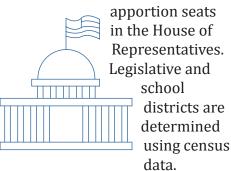

Census Data Shapes Indiana's Future

Hoosiers care because:

- Census data drives dollars for education, housing, health, and public safety.
 - Census data impacts strategic planning decisions

• The U.S. Constitution mandates that census data

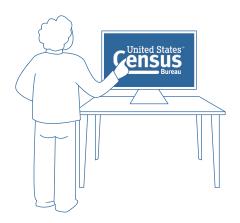

Hoosiers feel secure filling out the census because:

- The Census Bureau is bound by Title 13 of the United States Code to protect individuals and businesses.
- The Census
 Bureau
 collects
 information to produce
 statistics. Personal
 information cannot be used
 against respondents by any
 government agency
 or court.
- Census Bureau employees are sworn to protect confidentiality. It is a felony for census workers or other Census Bureau employees to publish or distribute individual responses or other information that would identify an individual, business, or organization.

It's easy for Hoosiers to take part because:

- We can respond by phone, internet, or mail.
- The Census Bureau ensures us data security in online response and language assistance for non-English speakers.
- We have opportunities to inform our communities to encourage an accurate count in 2020.

Frequently Asked Questions

WHAT IS THE DECENNIAL CENSUS?

Every 10 years, the federal government conducts a population count of everyone in the United States. Data from the census provide the basis for distributing more than \$675 billion in federal funds annually to communities across the country to support vital programs—impacting housing, education, transportation, employment, health care, and public policy. They also are used to redraw the boundaries of congressional and state legislative districts and accurately determine the number of congressional seats each state has in the U.S. House of Representatives.

WHY IS IT IMPORTANT TO ME?

Responding to the census is not only your civic duty; it also affects the amount of funding your community receives, how your community plans for the future, and your representation in government. Specifically, data from the 2020 Census are used to:

- Ensure public services and funding for schools, hospitals, and fire departments.
- Plan new homes and businesses and improve neighborhoods.
- Determine how many seats your state is allocated in the House of Representatives.

WHEN WILL I COMPLETE THE CENSUS?

The next census will take place in 2020. Beginning in mid-March, people will receive a notice in the mail to complete the 2020 Census. Once you receive it, you can respond online. In May, the U.S. Census Bureau will begin following up in person with households that haven't responded to the census.

HOW CAN I RESPOND?

In 2020, for the first time ever, the U.S. Census Bureau will accept responses online, but you can still respond by phone or mail if you prefer. Responding should take less time than it takes to finish your morning coffee.

WHAT INFORMATION WILL BE REQUESTED?

The decennial census will collect basic information about the people living in your household. When completing the census, you should count everyone who is living in your household on April 1, 2020.

WHAT INFORMATION WILL NOT BE REQUESTED?

The Census Bureau will never ask for:

- Social Security numbers.
- Bank or credit card account numbers.
- · Money or donations.
- Anything on behalf of a political party.

WILL MY INFORMATION BE KEPT CONFIDENTIAL?

Strict federal law protects your census responses. It is against the law for any Census Bureau employee to disclose or publish any census information that identifies an individual. Census Bureau employees take a lifelong pledge of confidentiality to handle data responsibly and keep respondents' information private. The penalty for wrongful disclosure is a fine of up to \$250,000 or imprisonment for up to 5 years, or both. No law enforcement agency (not the DHS, ICE, FBI, or CIA) can access or use your personal information at any time. Data collected can only be used for statistical purposes that help inform important decisions, including how much federal funding your community receives.

The Census Bureau has a robust cybersecurity program that incorporates industry best practices and federal security standards for encrypting data.
