

## Dear Families,

Learning and growing doesn't stop over the summer! This summer you can help your student accelerate their learning with Lalilo. The activities are fun and adapt to your student's level, so learners love to practice with Lalilo.

Lalilo is an online K-2 literacy program adored by kids. Practicing with Lalilo can help students become passionate and enthusiastic readers. Because Lalilo is available 24 hours a day, 7 days a week, students can explore the worlds of Lalilo anytime and anywhere they have an Internet connection.

Here are 5 ways to promote learning and reading with your student this summer:

- Set a learning schedule and stick with it.
- Read aloud to your student every day.
- Read your environment with your student. Look for signs and words in your home and neighborhood and read them together.
- Write together. Write emails, letters, or make cards to send to friends and family.
- Celebrate success when your student reaches a goal or makes progress in Lalilo.

With a little bit of support from you, Lalilo can keep your student motivated and reading this summer.

We wish you a wonderful summer full of learning and joyful experiences.
